

SUMMIT PROVIDER ALERT

STAY IN CONTROL AND INFORMED THROUGH ALL TOUCHPOINTS OF CARE

Improved data flow between hospital systems and the provider community is a necessity for enabling safe transitions and improving outcomes. Minimizing the disconnect between care settings by improving communication and disseminating key data surrounding significant healthcare events is also a mandated Meaningful Use 3 requirement.

The Summit Provider Alert solution enables efficient collaboration with patients' care teams through real-time notifications and distribution of critical documentation regarding significant hospital events. Provider Alert is an easy-to-use, web-based application that accommodates provider offices' workflow allowing organizations to coordinate care across the continuum.

PRODUCT DETAILS
